***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3, 5-6 and 8-12, drawn to a method for reducing the level of acrylamide in a food material by adding aldose reductase, classified in class 426, subclass 7 +.
- II. Claims 15-18, drawn to an article comprising a container, a label and a food product low in reducing sugar, classified in class 426, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct by method and product/packaged composition, as well as the fact that the article of composition of Group II does not require the particulars of the method of Group I, namely the use of aldose reductase and the particular resultant effect it provides.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Carl Roof on March 1, 2005, a provisional election was made without traverse to prosecute the invention of Group I, claims 1, 3, 5-6 and 8-12. Affirmation of this election must be made by applicant in replying to this Office action. Claims 15-18 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carl Roof (Reg. # 37,708) on March 1, 2005.

Please amend the claims as follows:

- Please **delete** non-elected claims 15-18.

Please amend claims 3 and 6 as follows:

**Claim 3.** The method of claim [2] 1, wherein said [~~reducing sugar altering enzyme~~] method further comprises adding glucose oxidase, pyranose oxidase, aldose dehydrogenase, or a mixture thereof, to the food material.

**Claim 6.** The method of claim 5, wherein said [~~reducing sugar altering enzyme~~] method further comprises adding glucose oxidase, pyranose oxidase, aldose dehydrogenase, or a mixture thereof, to the food material.
